

Moon Magnets

Grade Level: All

Introduction:

In this lesson students will create their own Moon Magnets.

Materials:

- Magnet sized Moon images (graphic provided)
- Scissors
- Clear flattened marble pieces (available at Michael's)
- Glue
- Small round magnets

Procedure:

1. Provide each student with an image of the Moon, a clear flattened marble, a magnet, scissors, and glue.
2. Students will cut out the round Moon image. Put glue on both sides of the Moon image. Glue the *image side* of the paper to the clear marble and backside of the picture to the magnet.
3. Let sit for several hours and allow students to take their Moon magnet home to hang where they chose!
